# how to store

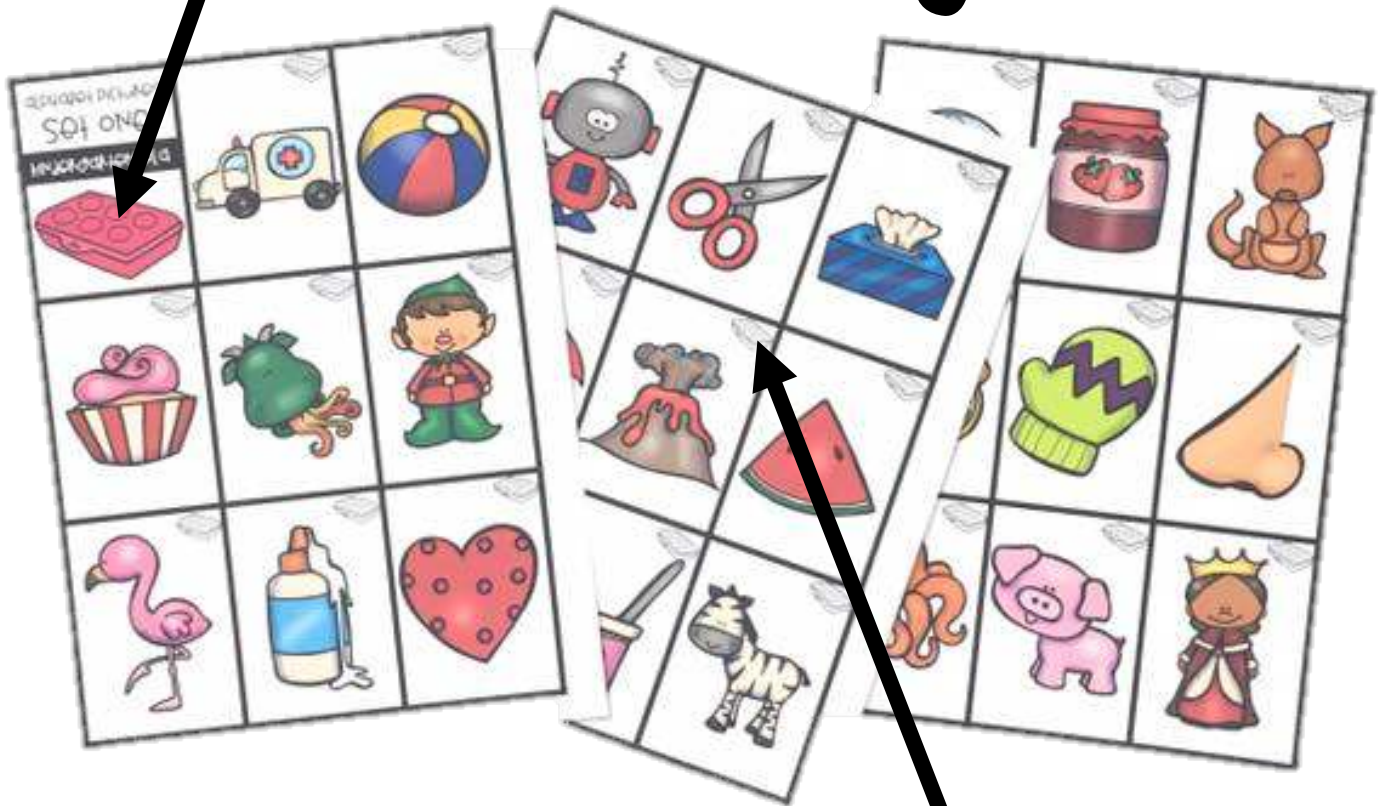

At the time of creation, The Dollar Tree sells small plastic food containers (2 for \$1) that fit these cards perfectly. However, they will easily fit into plastic travel soap dishes, plastic baggies, envelopes, or even on a ring. Store them however works best for your classroom!

# Organization

Each set of cards has a unique marker that matches the set label. This makes it easy to keep sets apart from one another if you need to mix them for some reason. It also helps students distinguish between sets and put them away correctly when they're finished using them!
